- HTML/CSS3
- javascript
- React/Nextjs/vite/Typescript
- GraphQL
- Nestjs
- strapi
- HTML/CSS3
- Tailwind
- Cypress/unit testing /ui testing
- Git
- Figma

ABOUT ME

As a front-end developer, I possess a strong passion for programming and writing efficient code. I am highly motivated to continually learn and expand my skill set.

Throughout my career, I have gained extensive experience in all stages of the development cycle for dynamic web projects. This includes requirements gathering, design, implementation, testing, and deployment. I am proficient in HTML5, CSS, JavaScript, React, Next.js, TypeScript, Nest.js/Node.js, Strapi, and GraphQL. Additionally, I have expertise in tools like Vite and Three.js, enabling me to create immersive and visually appealing web applications.

In terms of testing, I have hands-on experience with UI testing, unit testing, and Cypress library. I understand the importance of ensuring the quality and reliability of software through comprehensive testing methodologies.

With my diverse skill set and strong foundation in development, I am well-equipped to contribute to the success of any project. I am eager to take on new challenges and leverage my expertise to deliver high-quality software solutions.

WORK EXPERIENCE

○ july 2022- Present

FreeLance Frontend developer

- Worked on a frontend-only project for a car insurance website using Next.js. Collaborated with the design team to translate mockups into interactive and responsive user interfaces. Implemented client-side rendering (CSR) and server-side rendering (SSR) using Next.js framework. Integrated with API endpoints to fetch and display dynamic data related to car insurance plans and coverage.
- I built a course download application that connects with GraphQL and the Strapi dashboard. Users can easily browse and download educational courses, while the GraphQL integration ensures a smooth experience. The Strapi dashboard enables efficient content management. The application emphasizes intuitive design, error handling, and validation for a seamless user experience.

○ Rezeve Co.,Ltd / Singapore / 2021 - 2022

Remote Senior Frontend developer

I have played a key role at Rezeve, a start-up company that provides a service business mangment system specializing in building booking systems and generating web pages customized for each client's domain.

- Led a team of 3 engineers in developing a robust booking system, empowering businesses to efficiently manage their appointments and schedules.

Zheng Yu Leow

Co-Founder & COO at Rezeve |
SaaS & Business Management

- Developed a library of reusable UI components within Storybook, allowing for efficient collaboration and sharing of design assets across the team.
- Developed a comprehensive booking management system that allows businesses to efficiently schedule and manage appointments.
- Incorporated features similar to Google Calendar, providing users with familiar and intuitive scheduling capabilities.
- Designed and implemented a web dynamic page generation feature, allowing clients to showcase their unique brand and content on their personalized domains.
- Focused on delivering visually appealing web pages that enhance user experience and align with each client's brand identity.
- Collaborated closely with clients to understand their specific requirements and seamlessly integrated the generated web pages into their existing infrastructure.
- Contributed to the success of Rezeve by providing scalable and customizable solutions that enable businesses to effectively manage their bookings and present their services in an attractive and professional manner.

In summary, my work at Rezeve has centered around developing innovative booking systems and creating dynamic web pages tailored to individual client domains, ensuring a visually pleasing and cohesive online presence for businesses.

DigitHouse.Co,LTD && NexIdea Company
/ Myanmar - Japan / 2019 - 2021
